

WINDTECH™

Mic-Muff™

MICROPHONE WINDSHIELD
Fitted Fur Windscreen Cover

- Made In America!
- More than 40 different models
- 3/4" Fur length for maximum wind diffusion
- Specific models for original factory windscreens
- American made quality at a realistic, affordable price
- Models to fit both Professional and Consumer products
- Slips easily over existing windscreen, includes Velcro closure
- Acoustically transparent, doesn't degrade microphone performance

TAKE THE NEXT STEP IN PERFORMANCE...

The **Mic-Muff** has been tested and used in a variety of applications. Typically, the **Mic-Muff** will provide up to 20db of wind noise reduction in a 20 MPH wind with virtually no negative effect on frequency response. While the **Mic-Muff** is designed to be used over the foam windscreen that came with your microphone or video camera, some models are designed to fit over the mic alone and are listed with an * next to the model number. If improved performance or a replacement foam windscreen is needed, the **WindTech SG Series** offers models to fit most microphones and video cameras. The **WindTech BG Series** is also available for professional outdoor News and Film applications. There are specific **Mic-Muff** models to fit both the **SG** and **BG Series** windscreens.
